

## TX HE robot series for Humid Environments

New TX robot series ideally suited for applications in very humid environments (waterjet cutting, cleaning, food processing...)

### Characteristics:

- Enclosed structure of the arm (IP65 rated) reinforced by arm surpression for added waterproofness
- Resistant to liquids with a pH between 4,5 and 8,5
- Wrist and arm casing protections by surface treatment
- Tool flange and critical parts in stainless steel
- IP67 wrist protected against low pressure immersion and corrosion resistant
- Smooth shiny finish to facilitate arm cleaning
- Interconnection cables located underneath the arm for improved connection protection
